Maintain a separate GitHub repository(name as NeuroNexus for all the tasks and share the link of the GitHub repo in the task submission form(it will be given later through email).

You can refer to online resources such as Google Search and read tutorials. Watch videos(For Help).

SUBMISSION

A TASK SUBMISSION FORM will be shared later through email . Till then please continue your task.

A video need to be created to showcase your work, a demo of your effort.

For the Web Development internship, you will need to complete at least 2 tasks for successful completion of the internship.

The video can be hosted on LinkedIn for proof of your work and to build credibility among your peers. You can tag @NeuroNexusInnovations in such posts.

Please add #neuronexus in each of your task video postings on LinkedIn, Additionally, you can also add hashtags such as #internship #webdevelopment. for more reach and visibility

TASK 1 - LANDING PAGE

A landing page is an ideal web development project for beginners. It requires basic knowledge of HTML and CSS. Through this project, you'll learn to create columns, divide sections, arrange items, and add headers and footers. The most important aspect is unleashing your creativity to design an impressive page. Pay attention to alignments, padding, color palette, boxes, and other elements. Be mindful of CSS to avoid overlapping elements. In short, a landing page project allows you to apply HTML and CSS skills, encouraging your creativity while ensuring a visually appealing and user-friendly design.

TASK 2 - JOB BOARD

Build a job board website where employers can post job openings and job seekers can search and apply for jobs. Use React, Node.js, and a database like MongoDB or PostgreSQL

TASK 3 - ONLINE QUIZ MAKER

Create a platform that enables users to create and take quizzes. Users can input questions, multiple-choice answers, and correct answers to build a quiz. Other users can then take the quiz and receive immediate feedback on their scores.

TASK 4 - ECOMMERCE WEBSITE

Build an e-commerce website where users can browse products, add items to a shopping cart, and proceed to checkout. Implement features like user authentication, product filtering, and payment integration using technologies like React, Node.js, and MongoDB.

TASK 5 - PROJECT MANAGEMENT TOOL

Develop a project management tool that allows users to create projects, assign tasks, set deadlines, and track progress. Use React, Node.js, and a database like MongoDB or PostgreSQL.

ASK US FOR HELP!

THE PURPOSE OF THIS INTERNSHIP IS TO LEARN AND GROW.

We have no desire to dictate to you. It is entirely up to you whether you seek guidance or not.

The given tasks may seem very easy or very difficult. We expect you to approach the tasks with professional diligence and give them the attention they deserve."
